

# **FINAL PRESENTATION ASSIGNMENT**

At the end of the semester, each student in the project-based internship class will be required to give a presentation summarizing his/her ECP experience and the work done on the final project.

- **The presentation should cover your classroom experiences and work completed in conjunction with your career adviser. The presentation should be between 20 and 25 minutes long. If your presentation will go longer, you must first obtain permission from your teacher.**
- **You must assemble a PowerPoint to guide your presentation. Other types of visual aids such as handouts, charts, pictures, web pages, videos, etc. are also encouraged. All equipment needed for your presentation must be pre-arranged and tested by you, the presenter, or the equipment needed may not be available or won't work as you've planned!**
- **Each student will have a predetermined date and time during the ECP class period to give his or her presentation. Once this schedule is developed, it is strictly adhered to.**
- **Students are expected to dress and speak professionally during their presentation. See your teacher if you have questions about this requirement.**
- **The rubric for grading your presentation is part of your ECP orientation packet. Please familiarize yourself with it so you know what we'll be looking for.**
- **Your final project presentation is worth 180 points, which is nearly 15% of your overall grade. This is your opportunity to shine – use it wisely!**
