Steps Unit 4 Should Take Moving Forward

**Better Education**

- Bystander intervention training for staff and students.

- Unit 4 need **systemic** changes to its current health education curriculum.
  
  → Page 53; ‘The District’s Educational Program’ #2: Who is on this committee and how do people get on to it?
  
  → These topics should not be covered for 2 days in a health class. These topics need to be covered in age appropriate ways from elementary school onward.

- Defining ‘age appropriate’ content for high schoolers in classrooms and in high school Tier 1 messages.
  
  → There is also a student that has a program that the district can use.

- There should be resources made known and available for survivors to process and deal with the after effects (e.g., R.A.C.E.S., Courage Connection, etc.)
  
  → Page 54; “The Superintendent or Designee’s Investigation Process” #6: What kind of ‘specific measures?’

- If these issues cannot be changed in the next couple of years, there are a variety of community groups that could come in and present to students.
